1. Magnus covers the same shape with triangles, rhombuses, and trapezoids.

a. How many triangles will it take to cover the shape?

b. How many rhombuses will it take to cover the shape?

c. Magnus notices that 3 triangles from Part (a) cover 1 trapezoid. How many trapezoids will you need to cover the shape below? Explain your answer.

_______ triangles

_______ rhombuses

_______ trapezoids
2. Angela uses squares to find the area of a rectangle. Her work is shown below.
   a. How many squares did she use to cover the rectangle?

   \[
   \begin{array}{cccccc}
   \square & \square & \square & \square & \square & \square \\
   \square & \square & \square & \square & \square & \square \\
   \square & \square & \square & \square & \square & \square \\
   \square & \square & \square & \square & \square & \square \\
   \square & \square & \square & \square & \square & \square \\
   \square & \square & \square & \square & \square & \square \\
   \end{array}
   \]

   _______ squares

   b. What is the area of the rectangle in square units? Explain how you found your answer.

3. Each \[
   \square
   \]
   is 1 square unit. Which rectangle has the biggest area? How do you know?

   - Rectangle A
   - Rectangle B
   - Rectangle C
Lesson 2 Homework

Name _____________________________ Date __________________

1. Each □ is a square unit. Count to find the area of each rectangle. Then, circle all the rectangles with an area of 12 square units.

   a. 
   Area = _______ square units
   
   b. 
   Area = _______ square units

   c. 
   Area = _______ square units

   d. 
   Area = _______ square units

   e. 
   Area = _______ square units

   f. 
   Area = _______ square units

Lesson 2: Decompose and recompose shapes to compare areas.
2. Colin uses square inch pieces to create these rectangles. Do they have the same area? Explain.

3. Each  is a square unit. Count to find the area of the rectangle below. Then, draw a different rectangle that has the same area.
Lesson 3 Homework

Name ___________________________________________ Date ______________________

1. Each □ is 1 square unit. What is the area of each of the following rectangles?

A: _______ square units

B: _______

C: _______

D: _______

2. Each □ is 1 square unit. What is the area of each of the following rectangles?

a. 

b. 

c. 

d. 

A STORY OF UNITS

Area = _____________________
1. Ella placed square centimeter tiles on the rectangle below, and then labeled the side lengths. What is the area of her rectangle?

```
  2 cm
```

**Total area:** _______________________

2. Kyle uses square centimeter tiles to find the side lengths of the rectangle below. Label each side length. Then, count the tiles to find the total area.

```
```

**Total area:** _______________________

3. Maura uses square inch tiles to find the side lengths of the rectangle below. Label each side length. Then, find the total area.

```
```

**Total area:** _______________________

Lesson 4: Relate side lengths with the number of tiles on a side.
4. Each square unit below is 1 square inch. Claire says that the side length of the rectangle below is 3 inches. Tyler says the side length is 5 inches. Who is correct? Explain how you know.

5. Label the unknown side lengths for the rectangle below, and then find the area. Explain how you used the lengths provided to find the unknown lengths and area.

```
      |      |
      |      |
      |      |
      |      |
```

Total area: ________________________
Lesson 5 Homework

Name ___________________________ Date __________________

1. Use the centimeter side of a ruler to draw in the tiles, and then skip-count to find the unknown side length or area. Write a multiplication sentence for each tiled rectangle.

   a. Area: 24 square centimeters.
      
      \[ 4 \times ____ = 24 \]

   b. Area: 24 square centimeters.
      
      \[ ____ \times ____ = ____ \]

   c. Area: 15 square centimeters.
      
      \[ ____ \times ____ = ____ \]

   d. Area: 15 square centimeters.
      
      \[ ____ \times ____ = ____ \]
2. Ally makes a rectangle with 45 square inch tiles. She arranges the tiles in 5 equal rows. How many square inch tiles are in each row? Use words, pictures, and numbers to support your answer.

3. Leon makes a rectangle with 36 square centimeter tiles. There are 4 equal rows of tiles.
   a. How many tiles are in each row? Use words, pictures, and numbers to support your answer.
   b. Can Leon arrange all of his 36 square centimeter tiles into 6 equal rows? Use words, pictures, and numbers to support your answer.
   c. Do the rectangles in Parts (a) and (b) have the same total area? Explain how you know.
Lesson 6: Draw rows and columns to determine the area of a rectangle given an incomplete array.

1. Each □ represents a 1 cm square. Draw to find the number of rows and columns in each array. Match it to its completed array. Then, fill in the blanks to make a true equation to find each array's area.

   a. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$

   b. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$

   c. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$

   d. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$

   e. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$

   f. [Image of an array]
      $$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\text{sq cm}}$$
2. Minh skip-counts by sixes to find the total square units in the rectangle below. She says there are 36 square units. Is she correct? Explain your answer.

![Rectangle](image)

3. The tub in Paige’s bathroom covers the tile floor as shown below. How many square tiles are on the floor, including the tiles under the tub?

![Tub](image)

![Chessboard](image)
Lesson 7 Homework 3.4

Name ________________________________ Date ____________________

1. Find the area of each rectangular array. Label the side lengths of the matching area model, and write a multiplication equation for each area model.

<table>
<thead>
<tr>
<th>Rectangular Arrays</th>
<th>Area Models</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
<td><img src="image_a" alt="Image" /></td>
</tr>
<tr>
<td></td>
<td>2 square units</td>
</tr>
<tr>
<td>b.</td>
<td><img src="image_b" alt="Image" /></td>
</tr>
<tr>
<td></td>
<td>3 square units</td>
</tr>
<tr>
<td>c.</td>
<td><img src="image_c" alt="Image" /></td>
</tr>
<tr>
<td></td>
<td>4 square units</td>
</tr>
<tr>
<td>d.</td>
<td><img src="image_d" alt="Image" /></td>
</tr>
<tr>
<td></td>
<td>5 square units</td>
</tr>
</tbody>
</table>
2. Jillian arranges square pattern blocks into a 7 by 4 array. Draw Jillian’s array on the grid below. How many square units are in Jillian’s rectangular array?

a. 

b. Label the side lengths of Jillian’s array from Part (a) on the rectangle below. Then, write a multiplication sentence to represent the area of the rectangle.

3. Fiona draws a 24 square centimeter rectangle. Gregory draws a 24 square inch rectangle. Whose rectangle is larger in area? How do you know?
Lesson 8 Homework

Name ___________________________________________  Date _________________

1. Write a multiplication equation to find the area of each rectangle.

a. 3 cm  
   8 cm
   Area: ______ sq cm
   ______ × ______ = ______

b. 8 cm  
   6 cm
   Area: ______ sq cm
   ______ × ______ = ______

c. 4 ft  
   4 ft
   Area: ______ sq ft
   ______ × ______ = ______

d. 7 ft  
   4 ft
   Area: ______ sq ft
   ______ × ______ = ______

2. Write a multiplication equation and a division equation to find the unknown side length for each rectangle.

a. 3 ft  
   3 ft
   Area: 24 sq ft
   ______ × ______ = ______
   ______ ÷ ______ = ______

b. 9 ft  
   ______ ft
   Area: 36 sq ft
   ______ × ______ = ______
   ______ ÷ ______ = ______

Lesson 8: Find the area of a rectangle through multiplication of the side lengths.
3. On the grid below, draw a rectangle that has an area of 32 square centimeters. Label the side lengths.

4. Patricia draws a rectangle that has side lengths of 4 centimeters and 9 centimeters. What is the area of the rectangle? Explain how you found your answer.

5. Charles draws a rectangle with a side length of 9 inches and an area of 27 square inches. What is the other side length? How do you know?
Lesson 9: Analyze different rectangles and reason about their area.

1. Use the grid to answer the questions below.

   a. Draw a line to divide the grid into 2 equal rectangles. Shade in 1 of the rectangles that you created.

   b. Label the side lengths of each rectangle.

   c. Write an equation to show the total area of the 2 rectangles.
2. Alexa cuts out the 2 equal rectangles from Problem 1(a) and puts the two shorter sides together.
   a. Draw Alexa’s new rectangle and label the side lengths below.

   b. Find the total area of the new, longer rectangle.

   c. Is the area of the new, longer rectangle equal to the total area in Problem 1(c)? Explain why or why not.
1. Label the side lengths of the shaded and unshaded rectangles. Then, find the total area of the large rectangle by adding the areas of the 2 smaller rectangles.

a. 
\[
\begin{array}{c}
8 \\
5 \\
4
\end{array}
\]

\[9 \times 8 = (5 + 4) \times 8\]
\[= (5 \times 8) + (4 \times 8)\]
\[= \boxed{} + \boxed{}\]
\[= \boxed{} \text{ square units}\]

b. 
\[
\begin{array}{c}
5 \\
2
\end{array}
\]

\[12 \times 5 = (\boxed{+ 2}) \times 5\]
\[= (\boxed{} \times 5) + (2 \times 5)\]
\[= \boxed{} + 10\]
\[= \boxed{} \text{ square units}\]

c. 
\[
\begin{array}{c}
7
\end{array}
\]

\[7 \times 13 = 7 \times (\boxed{} + 3)\]
\[= (7 \times \boxed{}) + (7 \times 3)\]
\[= \boxed{} + \boxed{}\]
\[= \boxed{} \text{ square units}\]

d. 
\[
\begin{array}{c}
9
\end{array}
\]

\[9 \times 12 = 9 \times (\boxed{} + \boxed{})\]
\[= (9 \times \boxed{}) + (9 \times \boxed{})\]
\[= \boxed{} + \boxed{}\]
\[= \boxed{} \text{ square units}\]
2. Finn imagines 1 more row of nine to find the total area of $9 \times 9$ rectangle. Explain how this could help him solve $9 \times 9$.

3. Shade an area to break the $16 \times 4$ rectangle into 2 smaller rectangles. Then, find the sum of the areas of the 2 smaller rectangles to find the total area. Explain your thinking.
Lesson 11 Homework

1. The rectangles below have the same area. Move the parentheses to find the missing side lengths. Then, solve.

   a. Area: $4 \times _____ = _____ \text{sq cm}$

   b. Area: $1 \times 36 = _____ \text{sq cm}$

   c. Area: $4 \times 9 = (2 \times 2) \times 9$
      
      $= 2 \times 2 \times 9$
      
      $= _____ \times _____$
      
      $= _____ \text{sq cm}$

   d. Area: $4 \times 9 = 4 \times (3 \times 3)$
      
      $= 4 \times 3 \times 3$
      
      $= _____ \times _____$
      
      $= _____ \text{sq cm}$

   e. Area: $12 \times 3 = (6 \times 2) \times 3$
      
      $= 6 \times 2 \times 3$
      
      $= _____ \times _____$
      
      $= _____ \text{sq cm}$

2. Does Problem 1 show all the possible whole number side lengths for a rectangle with an area of 36 square centimeters? How do you know?
3. a. Find the area of the rectangle below.

![Rectangle](image)

b. Hilda says a 4 cm by 12 cm rectangle has the same area as the rectangle in Part (a). Place parentheses in the equation to find the related fact and solve. Is Hilda correct? Why or why not?

\[ 4 \times 12 = 4 \times 2 \times 6 \]

\[ = 4 \times 2 \times 6 \]

\[ = \text{______} \times \text{______} \]

\[ = \text{______ sq cm} \]

c. Use the expression 8 × 6 to find different side lengths for a rectangle that has the same area as the rectangle in Part (a). Show your equations using parentheses. Then, estimate to draw the rectangle and label the side lengths.
Lesson 12 Homework

1. A square calendar has sides that are 9 inches long. What is the calendar’s area?

2. Each square is 1 square unit. Sienna uses the same square units to draw a 6 × 2 rectangle and says that it has the same area as the rectangle below. Is she correct? Explain why or why not.

3. The surface of an office desk has an area of 15 square feet. Its length is 5 feet. How wide is the office desk?
4. A rectangular garden has a total area of 48 square yards. Draw and label two possible rectangular gardens with different side lengths that have the same area.

5. Lila makes the pattern below. Find and explain her pattern. Then, draw the fifth figure in her pattern.
1. Each of the following figures is made up of 2 rectangles. Find the total area of each figure.

**Figure 1:** Area of A + Area of B: _______ + _______ = _______ sq units

**Figure 2:** Area of C + Area of D: _______ + _______ = _______ sq units

**Figure 3:** Area of E + Area of F: _______ + _______ = _______ sq units

**Figure 4:** Area of G + Area of H: _______ + _______ = _______ sq units
2. The figure shows a small rectangle cut out of a big rectangle. Find the area of the shaded figure.

Area of the shaded figure:

\[ \text{Area} = \text{big rectangle} - \text{small rectangle} \]

3. The figure shows a small rectangle cut out of a big rectangle.

a. Label the missing measurements.

b. Area of the big rectangle:

\[ \text{Area} = \text{length} \times \text{width} \]

\[ \text{Area} = \text{missing} \times \text{4 cm} = \text{8 cm}^2 \]

c. Area of the small rectangle:

\[ \text{Area} = \text{length} \times \text{width} \]

\[ \text{Area} = \text{missing} \times \text{9 cm} = \text{missing cm}^2 \]

d. Find the area of the shaded figure.
Lesson 14 Homework

Name ___________________________________________ Date ______________________

1. Find the area of each of the following figures. All figures are made up of rectangles.

a. 

[Diagram of a figure with dimensions: 6 feet by 3 feet, 8 feet by 3 feet, and 3 feet by 3 feet]

b. 

[Diagram of a figure with dimensions: 8 inches by 5 inches, 3 inches by 2 inches, and 4 inches by 4 inches]
2. The figure below shows a small rectangle cut out of a big rectangle.

```
10 feet

<table>
<thead>
<tr>
<th>2 feet</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>2 feet</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>3 feet</th>
</tr>
</thead>

<table>
<thead>
<tr>
<th>2 feet</th>
</tr>
</thead>
</table>
```

a. Label the side lengths of the unshaded region.

b. Find the area of the shaded region.
Name ____________________________ Date ________________

Use a ruler to measure the side lengths of each lettered room in centimeters. Then, find the area. Use the measurements below to match, and label the rooms with the correct areas.

- Kitchen: 45 square centimeters
- Porch: 34 square centimeters
- Bathroom: 24 square centimeters
- Living Room: 63 square centimeters
- Bedroom: 56 square centimeters
- Hallway: 12 square centimeters
Jeremy plans and designs his own dream playground on grid paper. His new playground will cover a total area of 72 square units. The chart shows how much space he gives for each piece of equipment, or area. Use the information in the chart to draw and label a possible way Jeremy can plan his playground.

<table>
